Project title : MAROMA -Support for the conversion into fair trade (FFL) of 6 Aromatic and Medicinal Plants (PAM) in Morocco

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Morocco		Certification expertise	Oriane, Fair for Life	December 2020 - March 2021

Project's goals and results

Main goals
Support the company in obtaining its fair trade certification (Ecocert Fair for Life standard) on 6 agricultural and picking products

Specific objectives
OS1. Carry out a conversion diagnosis (identification of the differences between the practices and those required by the standard) and establish a conversion plan
OS2. Support the company's teams to build the methods and procedures adapted to the label through training of the human resources in charge, examples, observation, missions, exchanges...
OS3. Carry out a blank audit prior to the official audit in order to remove the last non-conformities
