Project title : ANADORA - Assistance to a cashew nut processing plant for organic certification in Côte d'Ivoire

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Côte d'Ivoire	24 000 €	Organic conversion expertise	Confidential, Incofin	June 2022 - June 2023

Project's goals and results

Main goals

To transmit our knowledge of the implementation of an organic certification within a cashew processing company as well as with its suppliers (cooperatives) in order to guide them in the understanding of the requirements, the training of the personnel and the progressive compliance of the stakeholders involved.

Specific objectives

SO1. Perform a comparison between the initial situation and the one required by the **organic farming** specifications in order to establish an action plan to limit the **risks** and achieve compliance (e.g. organizational measures, training, new procedures, agricultural practices, meetings, buffer zones, dedicated storage, etc.)
SO2. Support the company in the implementation of this **action plan** by providing advice, models, explanations, and adaptations to the constraints encountered, and then proceed with a **blank audit** to remove the last non-conformities
SO3. Facilitate relations with the **certification body** (quotation, audit, contamination, non-conformities...) and ensure a follow-up of the certification during the 3 years of conversion (perennial crops)
