

Project title : B4MOZ - Support for European Union programming for sustainable value chains and productive landscapes in Mozambique

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Mozambique	60 000 €	Sector and landscape expertise	GFA Consulting Group, EU - European Union	September 2023 - December 2023

Project's goals and results

Main goals

As part of the facility "The EU Biodiversity for Life - B4Life", an advisory service to strategically guide the future formulation of an EU-AAP-24 action to simultaneously support agro-forestry value chains and biodiversity conservation in a key landscape

Specific objectives

SO1. Provide a diagnosis of agro-forestry landscapes pre-selected by the European Union of Maputo, according to the geographical units of intervention (e.g. administrative jurisdictions, economic concessions, catchment areas, etc.) including an analysis of their governance structures. The diagnosis should align with NaturAfrica's 3 pillars (biodiversity conservation, green economy (including agro-forestry value chains), and territorial governance) and take into account various stakeholder categories and their inter-relationships

SO2. Propose strategic options relating to the themes, geographical units and categories of actors identified above, to be arbitrated by the project operators (European Union Delegation, Mozambican authorities), on the basis of prior exchanges/consultations with potential partners and competent authorities, upstream of the formulation of the action document

Beneficiaries

Results

Activities

A1. Identification and ranking of nature positive value chains

A2. Identification and ranking of terrestrial key landscapes for conservation and development in Mozambique, where a value chain approach would be relevant as an incentive for their integrated sustainable management/conservation/restoration

A3. Mapping of stakeholders, their needs, and interventions underway and in preparation

A4. Drafting of an intervention logic and strategic orientations

A5. Restitution of the complete strategic orientation note to the various stakeholders who were consulted in the first phase of the mission
