| Project place | Project cost | Role in the project | Technical and financial sponsors | Dates |
|---------------|--------------|--|----------------------------------|---------------------------------|
| Bolivia | | Value chain and conservation expertise | Prometa | September 2018 - September 2018 |

Project's goals and results

Main goals

Identify ways to improve the PROMETA project and the stakeholders involved, particularly on the structuring of the agricultural component

Specific objectives

- SO1.** Evaluation of the potential for conversion to organic farming
- SO2.** Identification of promising sectors (pistachio, coffee, essential oils, honey, etc.)
- SO3.** Technical support on the development of agroforestry models
- SO4.** Assess the potential of processed products that can be the subject of a Geographical Indication (GI)
- SO5.** Advice on the process for the creation and management of Protected Areas
