Project's goals and results

Main goals

Technical assistance on the energy and climate policy of the City of Bouaké

Specific objectives

Bouaké, Green City - Decentralized Cooperation, or BOVIVE-CD, aims to contribute to the fight against climate change by making Bouake a Green City. More specifically, it is expected at the end of the project that Bouake will be a leading and active member of a network of reciprocal exchanges of cities on the fight against climate change.

Beneficiaries

City of Bouake

Results

- ** R1. ** Awareness raising: The population, companies and public administrative services of Bouaké initiate actions of eco-citizen thanks to their sensitization and their support by the Commune on Sustainable Development
