

Project title : CACAOBIO - Support to the organic and fair-trade cocoa sector through the technical, commercial and organizational reinforcement of the SCEB cooperative

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Côte d'Ivoire	115 000 €	Cocoa and certification expertise	AVSF, SCEB - Société Coopérative Equitable du Bandama	April 2017 - September 2018

Project's goals and results

Main goals

Contribute to improving the practices of cocoa farmers by promoting an agro-ecological approach of organic cocoa productionThe project is a consortium between SCEB (leader), NGO RONGEAD and Coopérative Ethiquable

Specific objectives

The action aims to strengthen the capabilities of SCEB and extend the organic and fair models to the benefit of the country's producers

Beneficiaries

- 64 producers members of the cooperative: technical capacity building in organic farming and agroforestry practices
- The employees of SCEB, the Management Committee and the members of the internal control system: organizational capacities, management and quality (fermentation crates)
- Other cocoa farmers from the neighboring villages of Singrobo, N'gorankro, Okassou, Ambovia and Taabo (awareness raising and training in organic practices)

Results

- ** R1. ** The state of organic cocoa plots is improved by the establishment of partnerships and testing of certified organic products (biopesticides and organic fertilizers)
- ** R2. ** Productivity and resilience of organic cocoa plots increase with technical solutions for organic production in an agroforestry approach
- ** R3. ** The products' quality is improved by a technical support on beans fermentation and the reinforcement of quality control procedures
- ** R4. ** The strengthening of the cooperative's organizational and commercial capacities allows welcoming and following a growing number of producers

Activities

- ** A1. ** Establish partnerships and testing of curative products
- ** A2. ** Implement technical solutions adapted to organic production
- ** A3. ** Technical support to fermentation and strengthening of quality control procedures
