

Project title : CHAMPFNL - Development of non-timber forest product sectors with Gilé National Park

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Mozambique	70 000 €	Biodiversity and market expertise	AFD - French Development Agency, ANAC - National Administration for Conservation Areas, Fondation François Sommer - Fondation Internationale pour la Gestion de la Faune (FFS-IGF)	January 2022 - December 2022

Project's goals and results

Main goals

Nitidæ's consultancy during phase 1 had successfully enabled the identification of wild Miombo mushroom species, a market study, the installation of solar dryers and a first marketing test in Maputo which was very successful, as well as the start of honey production for the Park. This phase 2 aims to continue these efforts and help the Park to develop a commercial structure to make the link between the associations of producers and the market.

Specific objectives

Cleaning mushrooms in the forest

Collecting mushrooms in the Miombo forest
