

## Project title : COMOKA - Study on shea valorization activities in the Comoé area in northeast Ivory Coast

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Côte d'Ivoire	8 000 €	Shea expertise	GIZ	January 2016 - March 2016

### Project's goals and results

#### Main goals

Conduct a study on behalf of GIZ as part of the PROFIAB Nord project around the Comoé National Park in Ivory Coast: "Baseline study on shea resource and shea sector in the peripheral areas of the Comoé National Park in Ivory Coast"

#### Specific objectives

- Analyze production / processing in the PROFIAB intervention zone
- Identify the levers of improvement in order to propose recommendations for PROFIAB II projects

#### Beneficiaries

Shea producers from northern Ivory Coast participating in the PROFIAB project

#### Results

\*\* R1. \*\* Have a baseline for shea butter valorization activities in the Comoé area (to be compared to the PROFIAB II indicators)

\*\* R2. \*\* Provide estimates of shea valorization activities volumes in Comoé area (harvesting, almonds sold, products processed, marketed and consumed) making it possible to determine the importance and the potential of the sector in the different areas of intervention of PROFIAB

\*\* R3. \*\* Identify capacity building needs of actors; these practices are not limited to organizational and economic implications but take into account the environmental impacts of activities

\*\* R4. \*\* Choose the most promising approaches for promotional activities based on in-depth economic analyzes (conventional almonds, organic almonds, butter, etc.) and profits generated by pickers and processors.

#### Activities
