

## Project title : DIAGRO - Agrarian diagnosis and cocoa production potential of an (agro)forest in Côte d'Ivoire

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Côte d'Ivoire	30 000 €	Agrarian diagnosis expert	CONFIDENTIAL	July 2019 - February 2020

### Project's goals and results

#### Main goals

Study the possibilities of intervention of an integrated project inside and around an (agro) forest of 13,000 ha

#### Specific objectives

**SO1.** Establish a typology of farming systems in order to be able to define social safeguards adapted to the client strategy and to each type of producers

**SO2.** Estimate the amount of cocoa currently produced inside the forest and to explore the potential for organic cocoa marketing

#### Beneficiaries

#### Results

#### Activities

**A1.** Prepare a methodology for the agrarian diagnosis and elaborate the questionnaire

**A2.** Realize the survey to 80 producers in the field

**A3.** Analyze collected data

**A4.** Define the typology and links between agricultural production and deforestation

**A5.** Elaborate the recommendations to the client

**A6.** Estimate the cocoa current production
