

Project title : ERPDIVOIRE - Support for the development of the Emission Reductions Program Document (ERPD) of the jurisdictional REDD+ program of Ivory Coast

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Côte d'Ivoire	33 100 €	Technical assistance	ONFI - Office National des Forêts International, REDD+ Permanent Executive Secretariat	April 2017 - December 2018

Project's goals and results

Main goals

The Tai National Park Emission Reductions Program (ERP) is the first step in the implementation of the national REDD+ strategy initiated by the Republic of Ivory Coast. Its objective is to reach 28 million tonnes of CO2 of emission reductions by 2025, in the regional areas of Cavally, Nawa, San Pédro, Guémon and Gboklè (4.3 million hectares, including 2.7 million hectares of forest). The Government wishes to value this commitment to the reduction of deforestation by selling the associated carbon credits to the Forest Carbon Partnership Facility (FCPF) managed by the World Bank. The approval of this program by the FCPF could enable the purchase of nearly \$ 83 million of carbon credits.

Specific objectives

Support the firm ONF International, commissioned by the Government of Ivory Coast, in the development of the ERPD of the Tai National Park Program to access FCPF funding, and propose an innovative financial model that would foster the inclusion of local stakeholders in the financing of the program (co-financing).

Beneficiaries

The Government of the Republic of Ivory Coast and in particular the Ministry of Environment and Sustainable Development (MINEDD), the National REDD+ Commission (CN-REDD +) and its Permanent Executive Secretariat (SEP-REDD +).

Results

- R1.** Approval by the FCPF of the ERPD of the Tai National Park ERP
- R2.** Adoption of an innovative financial mechanism for the implementation of the program

Activities

- A1.** Support for the conceptualization of the overall ERPD and of its logical framework, in line with the national REDD+ strategy and other existing initiatives
- A2.** Stakeholders coordination and facilitation of bilateral consultations and workshops with a position of local representation of the ERPD experts mission in Ivory Coast
- A3.** Management of the drafting of the sections referring to the analysis of the drivers and agents of deforestation and technical assistance for the design of the chapters related to the definition of the activities of the program (actions leading to emission reductions), institutional arrangements and budget
- A4.** Synthesis on the initiatives and lessons learned from the private sector and drafting of a proposal to adapt these initiatives to the program in order to create an innovative model including local stakeholders in its funding
