

Project title : FINSTRAT - Building an environmental investment strategy for Alterfin by identifying risks when investing in agricultural value chains

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Burkina Faso, Côte d'Ivoire, Sierra Leone	43 000 €	Value chain risks expertise	Alterfin	September 2023 - February 2024

Project's goals and results

Main goals

Nitidæ proposes to support Alterfin in the strengthening of its environmental strategy by providing long-term coaching based on its experience in West African agricultural sectors and impact investment projects. The mission will identify potential negative **impacts** of its current portfolio, add selection **criteria** to its investment thesis and seek **improvement** opportunities of its investees. It will allow Alterfin to better manage **E&S risks** when investing in agricultural value chains and to better understand main negative environmental impacts and ways to avoid them

Specific objectives

SO1. Review of Alterfin's portfolio and current impact management tools

SO2. Online training sessions

SO3. Co-production of the environmental strategy
