

Project title : IMPACTGUM - Assessment of the impacts of the Acacia project of SOS Sahel

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Chad	6 500 €	Project evaluation	SOS SAHEL	October 2014 - November 2014

Project's goals and results

Main goals

The Acacia program is a program led by Sos Sahel and financed by Firmenich, Danone, Nexira, in particular, aimed at improving the producers' incomes, the conservation of the gommeraias, the improvement of the organization of the sector and the social promotion of populations. In Chad the program takes place in Chari Baguirmi, near the city of Dourbali, in the terroirs of Karnak and Awiya (28 villages).

Specific objectives

RONGEAD has been recruited as an expert on the NTFP sectors in Africa and on his very good knowledge of the project implementation regions in order to carry out a study to determine the impacts of the ACACIA project led by SOS SAHEL.

Beneficiaries

Stakeholders from the gum arabic sector in Chad

Results

The purpose of this study is to have data on the effects / impacts produced by the project after 5 years of implementation compared to the initial living conditions of the target groups. This is an analysis of the impact (social, economic) based on the results presented in the project report and on the basis of the results of the mid-term evaluation carried out in June 2012 by an external office study (KINOME).

Activities

- A1.** Check that the pilot program has worked and that it can be duplicated to scale
- A2.** Propose a concrete and precise plan of action to guide and guide the continuation of the program on Senegal Acacia and *Acacia seyal*
- A3.** Analyze the sustainability of impacts, strategies and actions regarding disengagement
- A4.** Analyze the tools for efficient financing of the sector for its empowerment
