

**Project title : KARPRESS - Construction of a motorized press for the production of briquettes and installation on a site proposed by Projets Solidaires, in the area of Banfora**

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Burkina Faso	2 600 €	Shea expertise	Projets Solidaires	November 2015 - December 2015

**Project's goals and results**

**Main goals**

- Provide Projets Solidaires with a motorized screw briquetting machine driver adapted to shea press cakes (modified BRADES model by RONGEAD)
- Guarantee driver functionality and users' efficiency

**Specific objectives**

- Order, monitor and set-up the motorized briquetting machine in Banfora
- Calibrate the machine and train machine operators

**Beneficiaries**

Groupings of women shea producers

**Results**

- \*\* R1. \*\* The machine is built, delivered and installed
- \*\* R2. \*\* The machine is functional and its operators are trained
- \*\* R3. \*\* The User's manual is available

**Activities**

- \*\* A1. \*\* The activity includes the order of the equipment, monitoring of the machine's construction and on-site set-up by the manufacturer (supported by RONGEAD-BF team)
- \*\* A2. \*\* The same team will start the machine and train future users. The team's experience (press cake preparation, quantity of water, etc.) will be shared
