

## Project title : MAGROC - Support for ISARA's Food'Africa Program to identify new Moroccan academic and professional partners

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Morocco	3 000 €	Market expertise	ISARA-Lyon	April 2023 - May 2023

### Project's goals and results

#### Main goals

As part of ISARA Lyon's strategy to develop its character as an international engineering school, the school participates in the Food'Africa program. This program makes it possible to deepen the academic relationship with other international actors while mobilizing public and associative actors. ISARA targets Morocco as a pilot country, a country with an important academic network and with dynamic private stakeholders

#### Specific objectives

**SO1.** Prospecting academic and professional networks and identifying other actors

**SO2.** Meeting of professionals network during the Salon de l'Agriculture au Maroc ([SIAM](#)) of Meknes (May 2 to 4, 2023)

**SO3.** Punctual monitoring of the acquired stakeholders network
