

Project title : PADITA - Project to support the innovative dissemination of agroecological techniques

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Burkina Faso	6 000 €	Coordination and expertise on okra sector	Conseil National de l'Agriculture Biologique, CIRAD - Agricultural Research for Development, IRD, ACF - Action Contre la Faim, CPF - Confédération Paysanne du Faso	June 2018 - January 2019

Project's goals and results

Main goals

Create a multi-stakeholder consortium to promote, through innovative dissemination tools, the adoption of techniques and principles of agroecology by producers in Burkina Faso

Specific objectives

- Review the state of agroecological practices in Burkina Faso
- Mobilize researchers in disseminating practices and involve producers in the whole process
- Promote the adoption of agroecology practices and principles by producers
- Capitalize the first effects of the project

Beneficiaries

120 small producers from the municipalities of Matiacoali (East) and Koumbri (North)

Results

R1. An inventory of techniques and practices of agroecology in Burkina Faso is carried out and validated by researchers and other actors

R2. Strong mobilization and involvement of researchers, producers and technical and financial partners throughout the process of the action

R3. Agroecology practices and principles are adopted by producers

R4. The first effects are capitalized

Activities

A1. Creation of a multi-stakeholder Burkinabe consortium in the field of agroecology then realization of a project launching workshop

A2. Census, analysis and validation of existing agroecological practices from available resources and from the activation of the network of different partners

A3. Diagnosis of the obstacles to the adoption of sustainable and modern agroecological practices by conducting surveys among beneficiaries

A4. Identification of tools (channels and supports) innovative, accessible and adapted to the effective dissemination of identified practices

A5. Develop and implement dissemination through the relevant identified tools to promote the adoption of practices by Burkina Faso producers

A6. Carry out monitoring, evaluation and capitalization of actions carried out during the project
