

Project title : PONASI2 - Sustainable landscapes and inclusive supply chains

| Project place | Project cost | Role in the project | Technical and financial sponsors | Dates |
|---------------|--------------|----------------------|---|-----------------------|
| Burkina Faso | 840 000 € | General Coordination | CERDE - Centre d'Etudes et de Recherches sur le Droit de l'Environnement, EU - European Union | July 2021 - July 2024 |

Project's goals and results

Main goals

In the continuation of the [PONASI](#) project, the objective here is the achievement of a sustainable management and a social and economic valorization of natural resources of the PONASI landscape, promoting the development of the local economy

Specific objectives

SO1. Commitment to **sustainable management** of forest resources

SO2. Development of **all-season income-generating activities** for the benefit of women and a significant contribution to the State's commitments in **carbon** capture

Beneficiaries

- Inhabitants of 4 villages of the 3 rural communes of **Bieha**, **Guiaro**, and **Nobere** located between the Protected Areas
- An estimation of 150 villages and 60,000 inhabitants in addition to the 30 villages supported by [PONASI](#) and the 20 others by [WAKANDA](#)

Results

R1. Development of **forest areas** through effective and sustainable community management and use of forest ecosystems

R2. Sustainable rural economy developed through a **structuring of inclusive sectors** at the local level (establishment of inclusive sectors for women and youth in targeted villages)

R3. Project management and communication provided and **inter-municipal cooperation** strengthened

Activities

A1. Standardization of a legal, legitimate, fair and equitable **community management** model

A2. Development and consensual approval of documents for community regulation

A3. Promotion of **optimal production** and **organized commercialization** of forest products and services from village conservation areas

A4. Development of an information kit on forestry jobs (development of income-generating forestry activities through market gardening and other agricultural sectors)

A5. Support for the development of **improved dolo stoves** (mapping, choice of species and establishment of productive water sources and adequate watering devices)

A6. Community involvement for the rehabilitation or reforestation of forest areas (3090ha)

A7. Identification and **protection** of market gardening areas and **supervision** of intensive production on 4 ha (support for marketing, rainfed crops adapted to the agro-ecological transition)

A8. Soil and biomass inventory and carbon assessment in village forests and conservation areas

A9. Support for the development of **inter-communal cooperation**, socio-cultural activities and promotion of solidarity in the periphery of the PONASI PAs (steering committee, mutual solidarity), solar system for household electrification...
