

Project title : SANRISK - Support to ANSSA to formulate a project at the STDF (WTO facility) for the control of sanitary and phytosanitary risks in the export sector of shea nuts, cashews and smoked fish from Mali

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Mali	45 000 €	Value chain and SPS expertise	WTO - World Trade Organization, ANSSA - Agence Nationale de la Sécurité Sanitaire des Aliments	November 2018 - July 2019

Project's goals and results

Main goals

The Standards and Trade Development Facility - STDF (Financial Facility for WTO Quality Policy) is a global partnership that helps developing countries to gain and maintain access to markets by tackling sanitary and phytosanitary (SPS) gaps, and promoting food safety, animal and plant health. It works to support sustainable economic growth, poverty reduction, food security and environmental protection (<http://www.standardsfacility.org>)

Specific objectives

Contribution to the project: Support for the control of sanitary and phytosanitary risks in the export sector of shea nuts, cashews and smoked fish from Mali

Beneficiaries

Results

Analyze the situation of 3 sectors (cashew, shea and smoked fish) to identify the challenges of these products in terms of food safety, production and trade and to formalize proposals for solutions.

Activities

- A1. Consultations of stakeholders involved in the 3 sectors
- A2. Analyzes of regulatory and legislative texts (CODEX in particular)
- A3. Analysis of production areas, SPS needs / difficulties and market linkages
- A4. Analysis of links that can be created with current programs
- A5. Development of 3 project documents for each product
