

## Project title : SENEVA - Qualitative and quantitative analysis of local, regional and global value chains for agribusiness industries for better added value and employment in Senegal

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Senegal	22 500 €	Value chain expertise	Deloitte, Islamic Development Bank - IsDB	September 2021 - March 2022

### Project's goals and results

#### Main goals

Technical assistance to the Government to identify promising agricultural sectors to promote consistent Government investment in the national and international market and private actors

#### Specific objectives

**SO1.** Identification of the sub-sectors (sectors) of the Senegalese agribusiness sector on which an in-depth analysis will be carried out later in the study and discussions with stakeholders from the private sectors, the client and the Government

**SO2.** High level analysis and description of the global value chain of the selected sectors and identification of relevant global stakeholders to meet

**SO3.** High level analysis and description of the value chain at the local level in Senegal of the sectors chosen and identification of relevant local stakeholders to meet

**SO4.** Assistance to the client and the Government with the realization of detailed plans on the constraints, the development opportunities and the strategy for the value chains
