

Project title : SENSOIL - Audit and technical, organizational and commercial support of essential oils produced by the Faniry domain in Madagascar

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Madagascar		Energy, market, agro-process and environment expertise	ISARA-Lyon, ASA Madagascar, Fondation Pajol, ASA France, ASAM Provence	May 2023 - December 2023

Project's goals and results

Main goals

Establish a diagnosis of the production and marketing of essential oils in the Faniry domain in order to propose improvement solutions

Specific objectives

SO1. Evaluate the production capacity of essential oils (taking into account capacities at the agronomic/agricultural level, extraction but also organizational, etc.)

SO2. Evaluate potential commercial outlets, especially on a local scale initially (depending on production volume, product quality, etc.).

Beneficiaries

Results

Distillation unit

Activities

A1. Identify the supply of aromatic plants

A2. Calculate the supply of firewood

A3. Estimate extraction capacity in 2023

A4. Analyze the marketing of essential oils

A5. Establish an optimal production scenario

Location of reforestation plots aged of 5 years at least
