

Project title : SHEAPES - Assessing impacts of the Shea Gets Greener project and build up a Qualification system for Environmental & Social performances

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Côte d'Ivoire, Ghana, Mali	192 000 €	Impact measurement expertise	Savannah Fruits Company	May 2022 - December 2024

Project's goals and results

Main goals

Implementation of a rating system for the environmental and social performance of Producers Organizations of Kernels and Shea Butter who are partners of SFC

Specific objectives

SO1. Completion of the impact study of the Shea Gets Greener project

SO2. Creation of a standard for measuring and monitoring the environmental and social performance of POs SFC partners as part of the Shea Gets Greener project

SO3. Integration of the standard developed within the SFC infrastructure

Beneficiaries

- 16 Kernels and Shea Butter Producers Organizations
- The Savannah Fruit Company

Results

R1. A standard adapted to the rating of the environmental and social performance of shea POs is created, based on the monitoring of the partner cooperatives of the Shea Gets Greener project

R2. The impacts of the Shea Gets Greener project on the environmental and social plans of partner POs are assessed

R3. SFC integrates the performance rating standard within its commercial infrastructure

Activities

A1. Definition of concept

A2. Baseline assessment

A3. Creation of reference documents and tools

A4. Monitoring, impact assessment and handover
