

Project title : TALAKY BE - Help strengthen the resilience of livelihoods from households facing climate change

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Madagascar			AFD - French Development Agency	August 2026 - August 2026

Project's goals and results

Main goals

Contribute to strengthening the resilience of livelihoods from households facing climate change

Specific objectives

SO1. Stengthen the resilience of farming households

SO2. Manage sustainably forest landscapes

SO3. Strengthen social and territorial cohesion

Beneficiaries

Targeted households: **7,560**

Results

R1. Resilient agriculture is practiced by households

R2. The resilience of vulnerable groups is strengthened

R3. Forest landscapes are restored

R4. The Beampingaratsy ecological corridor is preserved

R5. Sustainable and participatory forest management is supported

R6. The implementation of municipal land-use planning tools is supported

Activities

Component 1: Adaptation of agriculture to climate change

A1. Establishing and facilitating an information and advisory support system for climant-change-resilient agriculture

A2. Promoting diversification and improving the resilience of livestock farming

A3. Soil conservation and the development of sensitive agricultural areas

A4. Technical and material support for the structuring of resilient sectors

A5. Improving farmers' access to improved resilient seeds

Component 2: Restoration and sustainable management of forest landscapes and water source protection areas

A6. Establishing landscape and forest management plans

A7. Implementing landscape and forest restoration (LFR) through community, lineage, and individual approaches

A8. Implementing LFR in degraded forest areas under management transfer

A9. Developing specific activities to protect springs and riverbanks

Component 3: Contribution to social and territorial cohesion

A10. Supporting the structuring of the Anosy Region's Land Use Planning Department

A11. Strengthening the region's mapping capabilities

A12. Strengthening the capacity of municipalities to implement local planning documents

A13. Facilitating the land use planning process at the municipal level

A14. Contributing to the implementation of municipal climate change adaptation projects

Component 4: Project management, coordination, and monitoring and evaluation

This component will cover all management costs related to project implementation, including the deployment of activities in the field, with the management costs of the operating NGOs and the functioning of the UGP
