

Project title : TERROIRS - Integrated territorial approach in rural communities in the provinces of Sanguié and Boulkiemdé in Burkina-Faso

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Burkina Faso	5 868 000 €	Coordination	INADES, CERDE - Centre d'Etudes et de Recherches sur le Droit de l'Environnement, APAD Sanguié, EU - European Union	October 2023 - September 2027

Project's goals and results

Main goals

Contribute to strengthening the resilience of the populations of the Sanguié and Boulkiemdé provinces affected by the security crisis

Specific objectives

Rural communities in the provinces of Sanguié and Boulkiemdé are resilient to insecurity, climate change and economically competitive and sustainable

Beneficiaries

- Local economic stakeholders spread across 45 villages in 9 municipalities
- Target groups decentralized, deconcentrated and community institutions

Results

R1. Agroecological production is strengthened and made sustainable

R2. Sustainable management of natural ecosystems is improved

R3. Social cohesion and sustainable participatory governance of territories are boosted

R4. Communication, visibility, capitalization and knowledge management

Activities

A1. Agroecologically intensive cereal production with an increase in yields of at least 33%

A2. Agroecologically intensive market gardening is developed on 25 ha

A3. Sustainable NTFP value chains are supported through the establishment of 5 collective shea nut processing centers and the regeneration of 250 hectares of shea park

A4. Sustainable poultry value chains are supported and boosted

A5. 900 hectares of forest areas in the target municipalities are demarcated

A6. Reforestation actions are promoted with at least 800,000 fast-growing trees planted, with a survival rate of 80% at the end of the project

A7. Municipal forests demarcated and better managed by local authorities

A8. Social cohesion is strengthened by the implementation of socio-cultural actions

A9. A communication and visibility strategy and a knowledge capitalization and management model are developed and implemented

A10. Local authorities are informed
