

Project title : VANINA - Study and monitoring of deforestation in the vanilla supply basin for a company

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Madagascar	12 000 €	Deforestation and geoportal expertise	CONFIDENTIAL	January 2022 - February 2022

Project's goals and results**Main goals**

The company wants to assess deforestation in its supply area and monitor it in order to move towards a zero deforestation value chain

Specific objectives

SO1. Estimate past deforestation and the risk that affiliated producers have practiced deforestation in recent years (including a field mission to analyze the dynamics)

SO2. Production of a map of historical deforestation that can be used by the teams

SO3. Set up a monitoring tool (online geoportal fed by annual monitoring of deforestation and the evolution of risk) to ensure that there are no new deforested plots in supply areas

SO4. Transfer of skills and mastery of the tool by training a person within the company
