

Project title : VANSTEP - Vanilla supply chain study and technical support in São Tomé and Príncipe				
Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
São Tomé & Príncipe	55 000 €	Value chain expertise, agroprocessing	BirdLife International	January 2025 - January 2026
Project's goals and results				
<p><b>Main goals</b>            This study aims to strengthen the commercial capacities of cooperatives and private stakeholders working in the vanilla sector in São Tomé and Príncipe, strengthen the relationships between stakeholders, as well as improve potential outlets for finished products. Advice on marketing strategy and quality management are the main means to reach that objective.  <i>Photo credits : BirdLife International</i></p>				
<p><b>Specific objectives</b>  <b>SO1.</b> Assess the vanilla value chain in order to understand the required capacity building (production, processing, marketing)  <b>SO2.</b> Strengthen the capacities of key agents thanks to a technical support  <b>SO3.</b> Design a roadmap for the development of the sector and the strengthening of its positioning in the identified markets</p>
