

Project title : WAKANDA Landscape (West African Knowledge for Agriculture, Nature and Development Activities) - Participatory management of sustainable development on the outskirts of protected areas in the PONASI landscape

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Burkina Faso	5 440 000 €	Coordination	Fondation des amis de la Nature - NATURAMA, CERDE - Centre d'Etudes et de Recherches sur le Droit de l'Environnement, EU - European Union, FFEM - French Global Environment Fund	September 2020 - September 2025

Project's goals and results

Main goals

Rural development improves the living conditions of populations and strengthens the resilience of the territory

Specific objectives

The village organization and the development of social and income-generating activities in the PONASI landscape allow better cohesion, preservation of the environment and increased resilience to climate change

Beneficiaries

- **Group of agro-pastoralists and artisans constituting the main promoters of the local economy.** These are: 400 women in the production and marketing of horticultural products, 1,000 women in the collection, processing and marketing of NTFPs, 1,200 farmers and agro-pastoralists targeted for cultivation practices and management of resilient breeding, 500 forest technicians (CAF, ZOVIC / shea park)
- **Group of grassroots community organizations.** These are 20 borehole management committees, 20 natural resource management committees, 20 Women's Promotion Groups (MUSO / *Tontines*), 20 Popular Leisure Center managers, 6 Shea nut processing center managers, 10 Community Health Support Volunteers (VASC), 20 Village Development Committees (CVD)
- **Intercommunal Association** (44 elected officials including 4 Mayors)

Results

R1. The sustainable rural economy is developed

R2. Participatory local governance is boosted

R3. Effective project management, communication and relations with the authorities are ensured

Activities

- A1.** Establishment of productive water sources and adequate watering devices
- A2.** Mapping and choice of species
- A3.** Establishment of tree nurseries
- A4.** Establishment of Agroforestry perimeters
- A5.** Identification and protection of horticultural perimeters
- A6.** Identification of horticultural women producers and supervision of intensive vegetable production
- A7.** Marketing support
- A8.** Development of Non-Wood Forest Products - NTFPs
- A9.** Development of poultry activities
- A10.** Development of beekeeping activities
- A11.** Support for rainfed crops adapted to the agro-ecological transition of the landscape
- A12.** Installation of a solar power plant
- A13.** Awareness of the participatory and democratic aspect of grassroots community organizations
- A14.** Revitalization of village development committees
- A15.** Revitalization / creation of village natural resource management committees
- A16.** Dynamization of solidarity mutuals
- A17.** Promotion of cultural and social activities
- A18.** The establishment of a steering committee
- A19.** Development of a communication plan
- A20.** Sensitization of the authorities with a view to harmonizing the types of management of protected areas in the landscape
- A21.** Development of a geoportal
- A22.** Soil, biomass inventory and carbon assessment
