

## Project title : WAMANGO - Training companies to identify, assess, reduce and recover waste in mango processing in Burkina Faso

Project place	Project cost	Role in the project	Technical and financial sponsors	Dates
Burkina Faso	9 000 €	Process expertise	COLEACP	March 2021 - March 2022

### Project's goals and results

#### Main goals

Provide support to improve the competitiveness of the Burkinabe mango sector and advice on environmental and social issues

#### Specific objectives

The objective of the mission is to prepare and run a collective training course for managers of horticultural production companies and mango packing stations in Burkina Faso on the theme: "**Evaluation, Reduction and Valorisation of waste from the mango sector - Identifying, evaluating the quantity and valuing the waste**".

#### Beneficiaries

Managers of mango production, processing and packaging companies

#### Results

At the end of the training, participants from the companies should be able to:

- R1.** Understand the benefits of reducing and recovering mango waste
- R2.** Identify the types of mango waste generated throughout the production chain and the causes and critical stages
- R3.** Assess the amount of waste generated throughout the production chain using record sheets

#### Activities

- A1.** Preparation of the companies's accompaniment
- A2.** Remote learning on the use of record sheets
- A3.** Accompaniment in the company
- A4.** Data collection
- A5.** Report on in-company training and data collection
- A6.** Preparation, facilitation and reporting of the debriefing day
- A7.** Follow-up with companies
