

SEED PROJECT

At home or for your small enterprise
BIOGAS IS A GOOD SOLUTION

WHAT IS IT ?

conception graphique www.verdiele.fr

THIS BIODIGESTER PERMITS :

To save money by producing your own energy from organic wastes.

To benefit from an efficient fertilizer to use, exchange or sell...

SEED project is implemented by :

**Jumelage
Carbone**

HOW CAN I GET ONE ?

The **SEED project** stands for *Sustainable Energy for Economic Development*.

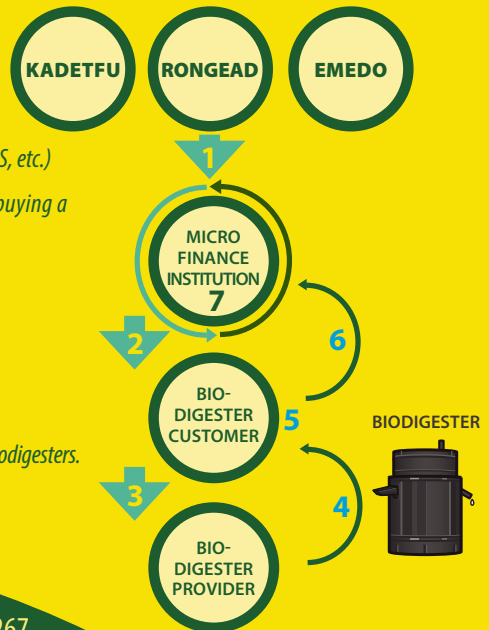

We promote biogas, a safe and clean renewable energy coming from the valorization of organic waste.

Biogas can be used for cooking and lighting.

Contact **Kadetfu** or **Emedo** to help set up an easy and affordable payment scheme to own a biogas unit.

FINANCIAL SCHEME

- 1 SEED project provides a grant to the Micro Finance Institution (SACCOS, etc.)
- 2 Micro Finance Institution provides loans to people interested in buying a biodigester. The access to loans is easier because of the grant.
- 3 Biodigester customer pays a provider for its biodigester.
- 4 The provider sets up the digester at the customer's.
- 5 The customer saves money by producing biogas with waste.
- 6 The customer pays his loan back regularly.
- 7 The financial institution uses its revolving fund to continue providing biodigesters.
